1. PRODUCT AND COMPANY IDENTIFICATION

1.1 Product identifiers

Product name: Ready Mixed Concrete
Synonyms: Concrete Ready Mix, Portland Cement Concrete, Ready Mix Stucco, Ready Mix Grout, Ready Mix, Concrete, Freshly Mixed Concrete, Colloidal Concrete, Permeable Concrete, Shotcrete, Gunite, Colored Concrete, Flowable Fill, Roller-Compacted Concrete, Fiber Reinforced Concrete

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses: Concrete is widely used as a structural component in construction applications

1.3 Details of the supplier of the safety data sheet

Company: USC Technologies
331 N Main St
Euless, Texas 76039
USA
Telephone: +1 817-835-4105

1.4 Emergency telephone number

Emergency Phone #: (800) 424-9300

2. HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)
Skin corrosion/irritation (Category 1B), H314
Serious eye damage/eye irritation (Category 1), H318
Carcinogenicity (Category 1B), H350
Specific target organ toxicity, single exposure (Category 2), H371
Specific target organ toxicity, repeated exposure (Category 2) H373

2.2 GHS Label elements, including precautionary statements

Pictogram:

Signal word: Warning
Hazard statement(s)
H314 Causes skin burns and eye damage
H318 Causes serious eye damage
H350 May cause cancer
H371 May cause damage to organs
H373 May cause damage to organs through prolonged or repeated exposure

Precautionary statement(s)
P201 Obtain special instructions before use.
P202 Do not handle until all safety precautions have been read and understood.
P260 Avoid breathing dust
P270 Do not eat, drink or smoke when using this product.
P281 Use personal protective equipment as required.
P301 + P330 + P331 If swallowed, Rinse mouth. Do not induce vomiting
P303 + P361 + P353 If on skin (or hair) remove/take off immediately all contaminated clothing. Rinse skin with water/shower

P305 + P351 + P338 If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P308 + P313 If exposed or concerned: Get medical advice/attention.

P309 + P311 If exposed or you feel unwell: Call a poison center or doctor/physician

2.3 Hazards not otherwise classified (HNOC) or not covered by GHS
None

4. FIRST AID MEASURES

4.1 Description of first aid measures

If inhaled
Dusts from hardened product may irritate the mouth, nose, throat and lungs. Remove person to fresh air. Dust in throat and nasal passages should clear spontaneously. Contact a physician if irritation persists or later develops.

In case of skin contact
Wash off with soap and plenty of water. Remove contaminated clothing. Contact physician if irritation persists.

In case of eye contact
Immediately flush eye(s) with plenty of clean water for at least 15 minutes, while holding the eyelid(s) open. Occasionally lift the eyelid(s) to ensure thorough rinsing. Beyond flushing, do not attempt to remove material from eye(s). Contact a physician if irritation persists or later develops.

If swallowed
If person is conscious do not induce vomiting. Give large quantity of water and get medical attention. Never attempt to make an unconscious person drink.

4.2 Most important symptoms and effects, both acute and delayed
Contact with wet product may result in chemical (caustic) burns and eye injury which may be progressive and could cause blindness. Wet product may result in chemical burns to the skin. Dust may irritate the skin and respiratory tract. Breathing silica-containing dust for prolonged periods in the workplace can cause lung damage and a lung disease called silicosis. Symptoms of silicosis may include (but are not limited to) shortness of breath, difficulty breathing with or without exertion; coughing; diminished work capacity; diminished chest expansion; reduction of lung volume; right heart enlargement and/or failure.

4.3 Indication of any immediate medical attention and special treatment needed
Not all individuals with silicosis will exhibit symptoms of the disease. However, silicosis can be progressive, and symptoms can appear at any time, even years after exposures have ceased. Persons with silicosis have an increased risk of pulmonary tuberculosis infection.
5. **FIREFIGHTING MEASURES**

5.1 **Extinguishing media**

   Suitable extinguishing media
   
   This product is not flammable. Use extinguishing agents suitable for surrounding materials.

5.2 **Unsuitable extinguishing media**

   None

5.3 **Special hazards arising from the substance or mixture**

   Contact with powerful oxidizing agents may cause fire and/or explosions (see section 10 of SDS).

5.4 **Advice for firefighters**

   No unusual fire or other hazards exist.

5.5 **Further information**

   The presence of this material in a fire does not hinder the use of any standard extinguishing medium. Use extinguishing medium for surrounding fire.

6. **ACCIDENTAL RELEASE MEASURES**

6.1 **Personal precautions, protective equipment and emergency procedures**

   Avoid contact with skin. Wear appropriate protective equipment as described in Section 8.

6.2 **Environmental precautions**

   Prevent further leakage or spillage. Do not let product enter drainage systems where it can harden and clog flow.

6.3 **Methods and materials for containment and cleaning up**

   Scrape wet concrete and place in container. Allow material to dry or solidify before disposal.

6.4 **Reference to other sections**

   For disposal see section 13.

7. **HANDLING AND STORAGE**

7.1 **Precautions for safe handling**

   Respirable crystalline silica-containing dust may be generated during processing, handling, and storage. Use all appropriate measures of dust control or suppression, and Personal Protective Equipment (PPE) described in Section 8.

7.2 **Conditions for safe storage, including any incompatibilities**

   Keep container tightly closed in a dry and well-ventilated place.

7.3 **Specific end use(s)**

   Apart from the uses mentioned in section 1.2 no other specific uses are stipulated.

8. **EXPOSURE CONTROLS/PERSONAL PROTECTION**

8.1 **Control parameters**

**8.2 Exposure controls**

**Appropriate engineering controls**
Minimize splashing through concrete discharge flow rates. While cutting, crushing or grinding hardened concrete, minimize dust generation through suppression and ventilation methods.

**8.3 Personal protective equipment**

**Eye/face protection**
Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations in 29 CFR 1910.133 or 29 CFR 1926.103.

**Skin protection**
Waterproof gloves, rubber boots, and clothing sufficient to protect skin from contact with wet product should be worn. Clothing saturated from contact with wet product should be removed promptly to prevent continued contact with skin. After working with product, workers should clean their skin with soap and water. Clean clothing should be worn after showering.

**Respiratory protection**
Not required when working with wet product. Activities that generate dust from hardened dry product require the use of a NIOSH approved dust respirator for the exposure circumstances involved

**Control of environmental exposure**
Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

**9. PHYSICAL AND CHEMICAL PROPERTIES**

**9.1 Information on basic physical and chemical properties**

- **Appearance:** Semi-fluid, flowable paste
- **Color:** Usually grey
- **Odor:** Odorless
- **pH:** 12 - 13
- **Melting/Freezing point:** No data available
- **Initial boiling point & range:** No data available
- **Flash point:** No data available
- **Evaporation rate:** No data available
- **Flammability (solid, gas):** No data available
9.2 Other safety information

No data available

10. STABILITY AND REACTIVITY

10.1 Reactivity
Not reactive under normal use.

10.2 Chemical stability
Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions
No data available

10.4 Conditions to avoid
Exposure to moisture.

10.5 Incompatible materials
Unhardened concrete is alkaline and is incompatible with acids, ammonium salts and aluminum metals. Portland cement dissolves in hydrofluoric acid and produces silicon tetrafluoride gas. Portland cement reacts with water to form silicates which in turn react with powerful oxidizers such as fluorine, boron trifluoride, chlorine trifluoride, manganese trifluoride and oxygen difluoride.

10.6 Hazardous decomposition products
No data available

11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

Acute toxicity
Not classified
Skin corrosion/irritation
Causes severe skin burns
Serious eye damage/eye irritation
Causes serious eye damage
Respiratory or skin sensitization
No data available
Germ cell mutagenicity
No data available
Carcinogenicity
May cause cancer (inhalation)
Reproductive toxicity
No data available
Specific target organ toxicity - single exposure
May cause respiratory irritation
Specific target organ toxicity - repeated exposure
May causes damage to organs (lungs, respiratory system) through prolonged or repeated exposure (inhalation)
Aspiration hazard
No data available

12. ECOLOGICAL INFORMATION
12.1 Toxicity
No data available
12.2 Persistence
No data available
12.3 Bioaccumulative potential
No data available
12.4 Mobility in soil
No data available
12.5 Other adverse effects
No data available

13. DISPOSAL CONSIDERATIONS
Material can be retained until it hardens, and then disposed of as solid waste. Place contaminated materials in appropriate containers and dispose of in a manner consistent with applicable federal, state, and local regulations. Prevent from entering drainage, sewer systems, and unintended bodies of water. It is the responsibility of the user to determine, at the time of disposal, whether product meets criteria for hazardous waste. Product uses, transformations, mixture and processes, may render the resulting material hazardous.

14. TRANSPORT INFORMATION
